

Afame Technologies

PROJECT REPORT DATA ANALYSIS ON E-COMMERCE DATASET

Presented by:
Akshit Gandotra

Self Introduction

I'm Akshit, thrilled to present myself in the realm of data analysis. With a keen interest in uncovering insights and driving informed decisions through data, I eagerly embrace opportunities to contribute meaningfully to analytical endeavors. Collaboration forms the cornerstone of my approach, recognizing the collective power in diverse perspectives and teamwork.

Throughout my journey, I've remained steadfast in upholding a commitment to excellence, ensuring that every analytical endeavor reflects the utmost precision and depth. My mission is rooted in leveraging data to empower individuals and businesses, facilitating informed strategies and fostering growth. I'm genuinely excited about the prospect of connecting with fellow data enthusiasts and embarking on transformative analytical journeys together.

Introduction to Afame Technologies

Afame Technologies stands as a beacon in the digital landscape, offering a comprehensive suite of services tailored to meet the diverse needs of businesses. Specializing in web development, digital marketing, and strategic consulting, Afame Technologies is committed to delivering cutting-edge solutions that drive success in the digital realm.

Afame Technologies envisions a future where businesses of all sizes thrive in the digital ecosystem. Their vision is to be the catalyst for this transformation, empowering our clients to reach new heights of success through technology, innovation, and strategic guidance.

Importance of Data Analysis for Business Growth:

Data analysis is vital for business growth as it provides actionable insights, allowing informed decision-making and strategic planning. By leveraging data effectively, businesses can identify opportunities, optimize operations, and gain a competitive edge in today's dynamic market landscape.

Goals and Objectives

Project Goals:

Utilize sales data analysis to extract valuable insights, including patterns, best-selling items, and revenue indicators, to facilitate data-driven decision-making for business enhancement.

Project Objectives:

1. **Data Exploration:** Extract insights from a sales dataset, focusing on total sales and revenue measures.
2. **Product Analysis:** Identify top-selling items and their impact on revenue.
3. **Trend Identification:** Analyze sales trends over time to uncover patterns and fluctuations.
4. **Visualization:** Present findings through visualizations for clear communication.
5. **Recommendations:** Provide data-driven suggestions for improving sales tactics and strategy optimization.

About the Data

Dataset Link:

https://drive.google.com/drive/folders/1SBScS_ixyyh4VtI3DaCbmgvCflgddyJv

Data Summary:

- Total Entries: 51,290 rows and 24 columns
- Date Columns: 'Order Date' and 'Ship Date' converted to datetime format.
- Missing Values: 'Postal Code' column has 41,296 duplicate values.
- Data Types:
 - Integer: 2 columns
 - Float: 5 columns
 - Datetime: 2 columns
 - Object: 15 columns

This summary provides a snapshot of the dataset after preprocessing, highlighting key statistics and data types essential for further analysis and decision-making.

Data Description

The E-commerce dataset in the US Superstore Dataset catalogues unique orders, detailing order IDs, dates, shipping information, customer demographics, product details, and financial metrics..

Row ID	Order ID	Order Date	Ship Date	Ship Mode	Customer ID	Customer Name	Segment	City	State	Country	Postal Code	Market	Region	Product ID

Total Sales

The total sales calculated for all entries were equal to:

Total Sales: \$ 12642501.909880001

```
# Compute Total Sales
total_sales = df['Sales'].sum()
print("Total Sales: $", total_sales)
```

✓ 0.0s

Total Sales: \$ 12642501.909880001

```
# Compute Total Sales Over Time
total_sales_over_time = df.groupby(df['Order Date'].dt.to_period('M'))['Sales'].sum()

# Plot Total Sales Over Time
plt.figure(figsize=(10, 6))
total_sales_over_time.plot(kind='line', marker='o', color='blue')
plt.title('Total Sales Over Time')
plt.xlabel('Month')
plt.ylabel('Total Sales ($)')
plt.grid(True)
plt.show()
```

Analyze Sales Trends over Time

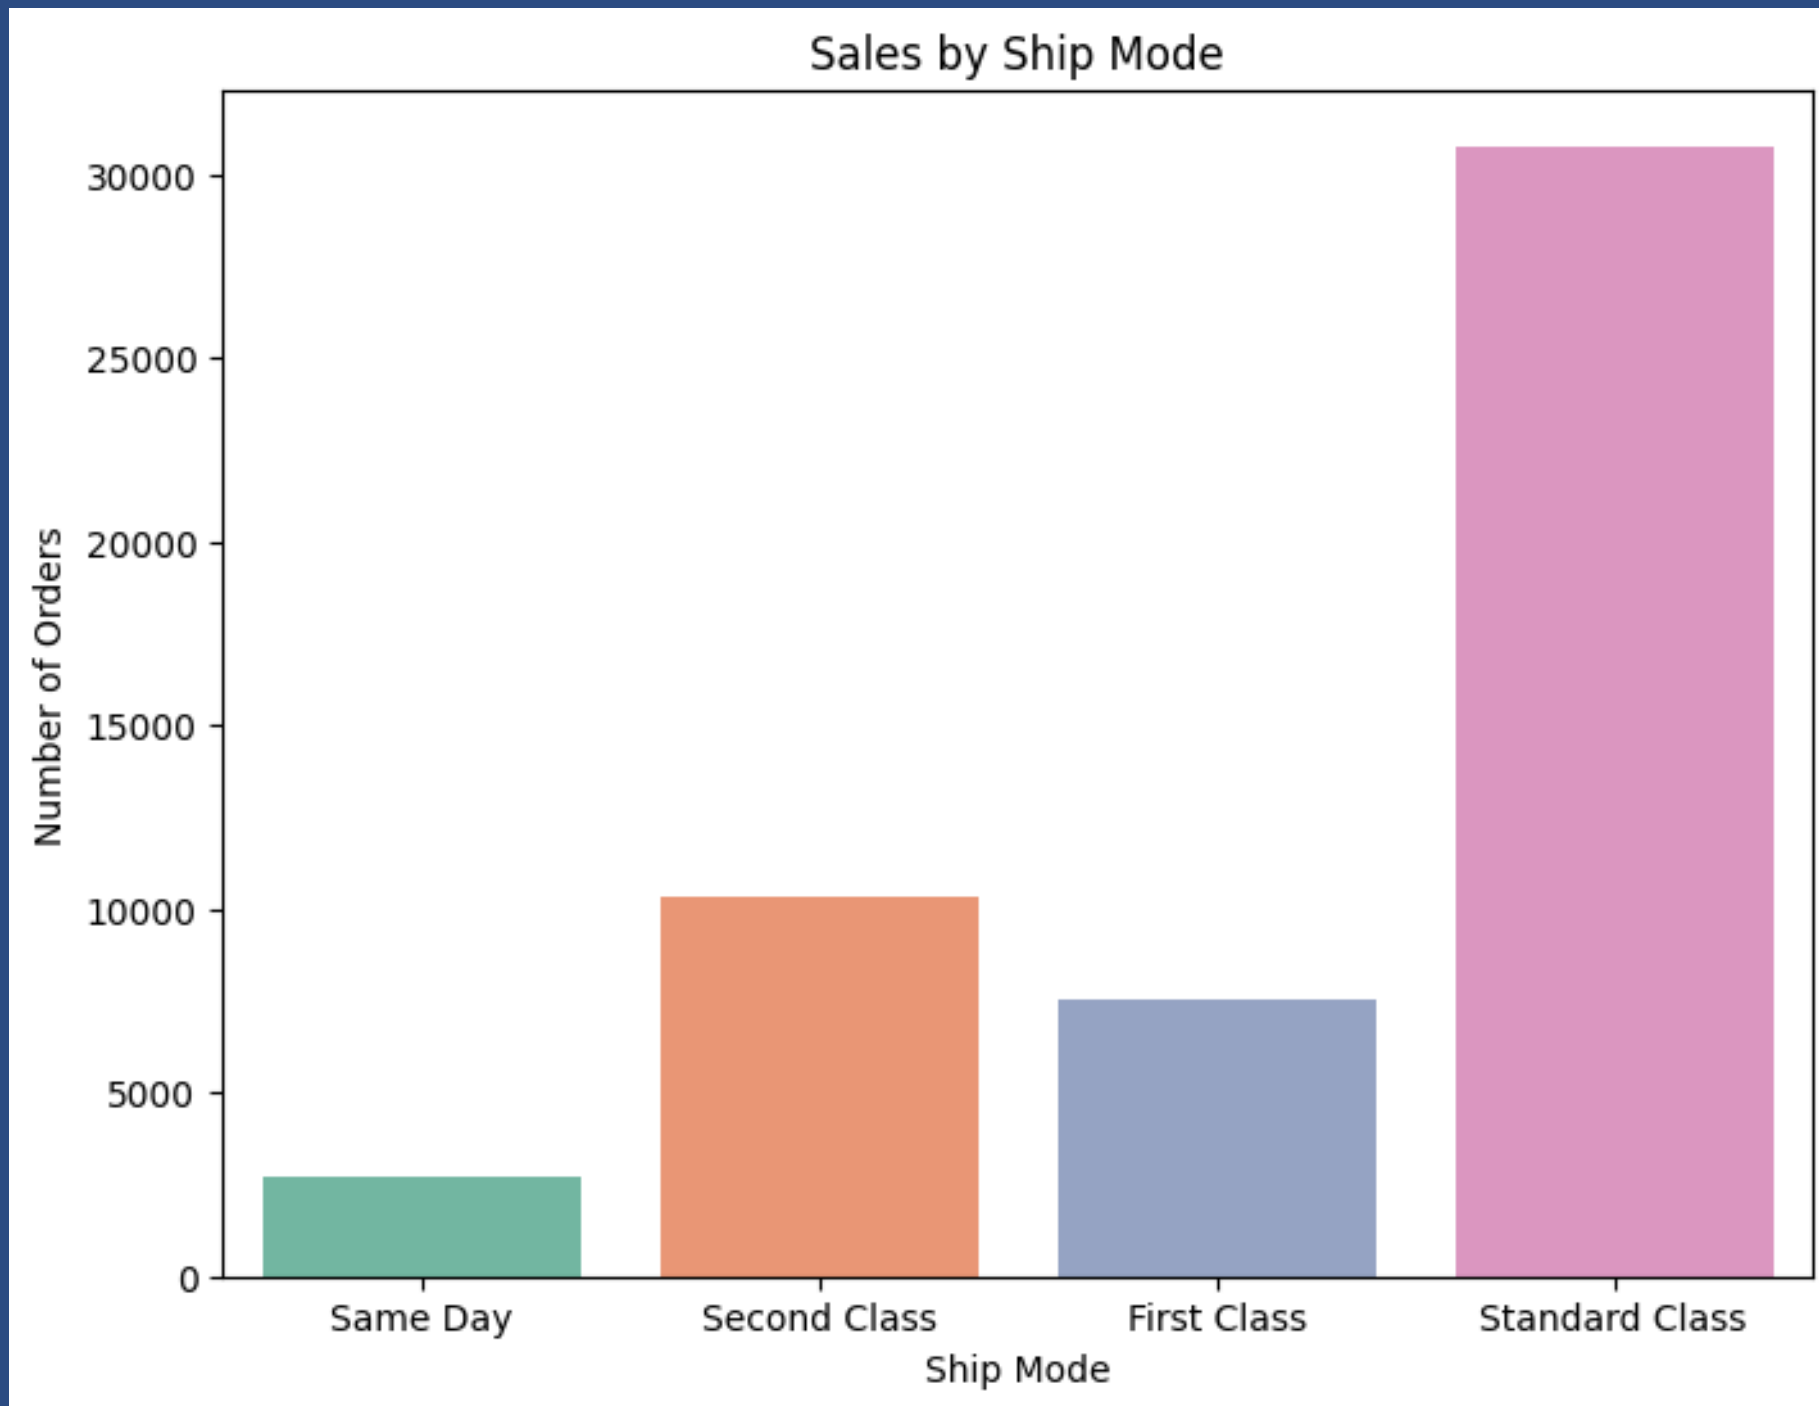

The sales data indicates a positive trend over the past five years. There's a seasonal peak in the fourth quarter, with sales consistently rising throughout the year.

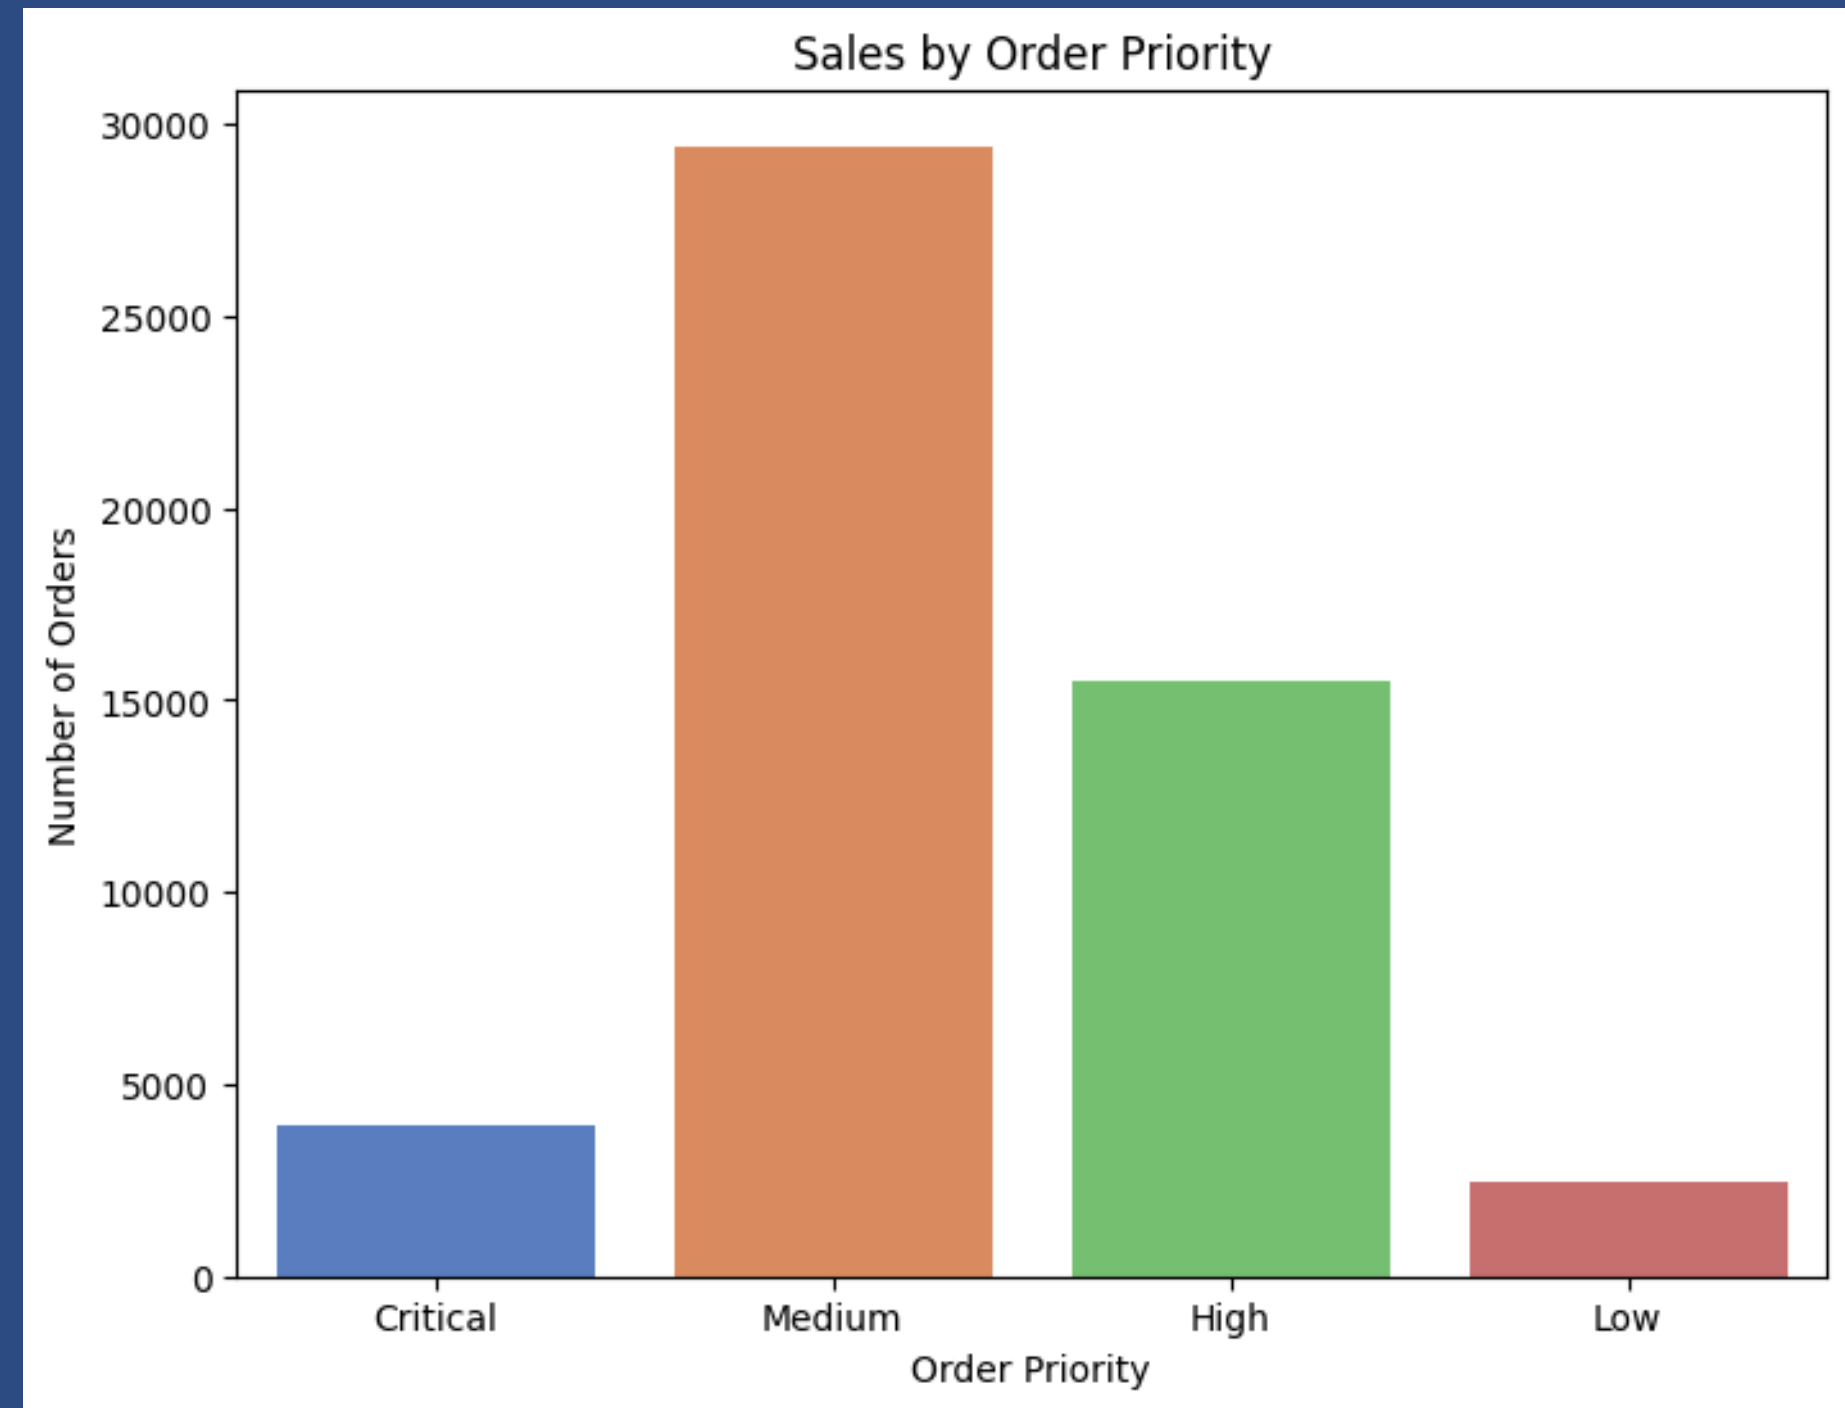

Determine the best-selling products

Product Name	Total Sales
Apple Smart Phone, Full Size	\$86,935.7786
Cisco Smart Phone, Full Size	\$76,441.5306
Motorola Smart Phone, Full Size	\$73,156.3030
Nokia Smart Phone, Full Size	\$71,904.5555
Canon imageCLASS 2200 Advanced Copier	\$61,599.8240
Hon Executive Leather Armchair, Adjustable	\$58,193.4841
Office Star Executive Leather Armchair, Adjustable	\$50,661.6840
Harbour Creations Executive Leather Armchair, Adjustable	\$50,121.5160
Samsung Smart Phone, Cordless	\$48,653.4600
Nokia Smart Phone, with Caller ID	\$47,877.7857

Key Takeaways

- **Total Sales:** The total sales amount for the dataset is approximately \$12,642,501.91, indicating significant revenue generation.
- **Sales Trends Over Time:** Fluctuations in sales over the months suggest potential seasonality or trends. Further analysis can help identify patterns and inform business strategies.
- **Best-Selling Products:** The top-selling products include various smart phones, office furniture, and copiers. Understanding the performance of these products can guide inventory management and marketing efforts.
- **Ship Mode:** Standard Class is the most common shipping mode, followed by Second Class and First Class.
- **Region:** Sales are distributed across different regions, with Central, South, and EMEA regions having relatively higher sales counts.
- **Category:** Office Supplies account for the majority of sales, followed by Technology and Furniture.
- **Market:** Sales are spread across different markets, with APAC, LATAM, and EU being the prominent ones.
- **Order Priority:** Medium and High priority orders are more common compared to Critical and Low priority orders.

Thank
you
